INSTRUCTIONS

This is a game for all psychopathic rodent enthusiasts.
To load the game enter on your 48K Oric:
CLOAD'''' for the fast version (2 copies).
CLOAD'''',S for the slow version (1 copy).

In the sewers the rats have been multiplying for years and so a rat cull has been organised. You have been chosen to carry out this gruesome task. You will have to kill the rats by hitting them with your "ACME Patent Rat Killing Hammer". You will only be able to hit a rat when it is directly beneath the hammer, so fast reactions are essential. Unfortunately in the sewers lives an aggressive monster which has sentimental feelings towards the rats and will get very angry if you hurt his furry friends. By pressing a key you can swap the hammer for an aerosol can, this will allow you to kill the monster. The cheese is used as bait to attract the rats and must be protected. If you kill a rat when it has begun eating some cheese then the cheese will be saved. Your aim is to kill 15 rats but if you take too long the smell of the cheese will overpower you. You will die if you are touched by the monster, overpowered by the smell or if all the cheese is eaten.
Good Luck!!

RAT CATCHER

Rat catcher now,
try your best
You'd better work hard
they never stop to rest.

Squeaking and scratching
Our furry foe,
If you're not fast enough
they'll bite off your toe.

Evil creatures
In the sewer
kill those rats
And they get fewer.

In the dark
You're all alone
the rats bite your flesh
through to the bone.

Concept by John Marshall, Paul Kaufman, Geoff Phillips. *Programming by* John Marshall. *Rat drawing by* Carolyn Groenveld. *Poem by* John Kaufman.
